Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Postsecondary Education Section, Education, Culture and Tourism Division, Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-1105)

or to the Statistics Canada reference centre in:

| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
|------------|------------|----------------|------------|
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (992-4734) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 016.

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section de l'enseignement postsecondaire, Division de l'éducation, de la culture et du tourisme, Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-1705)

ou au centre de consultation de Statistique Canada à:

| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
|------------|------------|----------------|------------|
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (992-4734) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

SYMBOLS

The following symbols are used in this Statistics Canada publication:

- ... figures not appropriate or not applicable.
 - nil or zero.
 - x the median salary was not calculated if the number of persons in any distribution was less than 10. Quartiles were not calculated unless the number of persons in any distribution was 30 or more.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés dans cette publication de Statistique Canada:

- ... n'ayant pas lieu de figurer.
 - néant ou zéro.
 - x le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes. Les quartiles ne sont pas calculés là où, dans une répartition le nombre de personnes est de 30 ou moins.

INTRODUCTION

This report continues the annual series of publications on full-time teachers in Canadian universities and colleges. It presents statistics on the qualifications, age, citizenship and salaries of full-time university teachers in nine provinces for the 1982-83 academic year. Since data for the province of Quebec are not available, the detailed statistical tables do not include Quebec, for the text tables, 1980-81 data for Quebec have been used so that national totals could be provided.

Data Collection and Coverage

The survey is conducted annually and is designed to collect information on the characteristics of full-time teachers in degree-granting institutions. For the year 1982-83, 89 universities and affiliated colleges from nine provinces reported data on 26,350 staff members. A list of reporting institutions is included in Appendix A. Although they grant degrees, the Atlantic Institute of Education, Richmond College and Athabasca University were not surveyed as they employ only part-time teachers.

At the time of publication no data were available from the province of Quebec and consequently, tables include data for nine provinces only.

For the purpose of this survey, teaching staff includes all academic staff within faculties (colleges, schools, etc.) who are teaching or performing administrative duties. Also included are senior administrative staff, academic staff in teaching hospitals and visiting academic staff.

Presentation of Data

The following points should be noted concerning the major classifications used in the tables.

Rank

All institutions surveyed (with the exception of Ryerson Polytechnical Institute

Le présent document s'inscrit dans la série des publications annuelles sur les enseignants à plein temps dans les collèges et universités du Canada. Il renferme des données sur les titres de compétence, l'âge, la citoyenneté et le traitement des professeurs d'université à plein temps dans neuf provinces pour l'année scolaire 1982-83. Les données pour la province de Québec ne sont pas disponibles et conséquemment les tableaux statistiques détaillés ne comprennent pas la province de Québec. Les données du Québec pour l'année 1980-81 ont été substitué afin que les tableaux explicatifs représentent des chiffres pour tout le pays.

Collecte et champ d'observation

L'enquête, qui a lieu une fois l'an, vise à recueillir des données sur les caractéristiques de l'ensemble des enseignants à plein temps des établissements qui décernent des grades. En 1982-83, 89 universités et collèges affiliés situés dans neuf provinces ont déclaré des données sur 26,350 membres de leurs effectifs. La liste des institutions répondantes est comprise à l'appendice A. Bien qu'ils décernent des grades, l'Atlantic Institute of Education, le Richmond College et l'Athabasca University n'ont pas été pris en compte parce qu'ils n'ont que des enseignants à temps partiel.

Au moment de la publication, aucune donnée n'était disponible concernant la province de Québec; les tableaux ne comprennent donc des données que pour neuf provinces.

Aux fins de l'enquête, le corps professoral se compose de l'ensemble du personnel (des collèges, des écoles, etc.) qui assument des fonctions d'enseignement ou de direction. Le personnel de direction supérieure, le personnel enseignant des hôpitaux d'enseignement et les enseignants invités ou visiteurs sont aussi compris.

Présentation des données

Voici quelques observations utiles à propos des principales classifications utilisées dans les tableaux.

Rang

Tous les établissements enquêtés utilisent quatre catégories pour désigner le niveau de which does not have a rank structure) use the following four categories to designate level of appointment: full professor, associate professor, assistant professor and rank below assistant professor. Staff with a rank two levels below assistant professor, ungraded staff and visitors are all grouped together in the category "Other".

Administrative Duties

Information on staff "with senior administrative duties" is presented in the three summary tables (1D, 2D and 4D). Included in this category are deans, vice-deans, associate deans, department heads, co-ordinators and chairmen.

Highest Earned Degree

The five categories used to display the level of highest earned degree are as follows: Doctorate, Masters, Professional, Bachelor and other. Professional degrees occur in disciplines where the normal first degree is not a Bachelor degree, such as: M.D. (Doctor of Medicine), D.D.S. (Doctor of Dental Surgery), D.D.M. (Doctor of Dental Medicine), D.V.M. (Doctor of Veterinary Medicine). The "Other" category includes: Professional designations other than a degree, e.g., C.A. (Chartered Accountant), R.I.A. (Registered Industrial Accountant) and undergraduate diploma. Staff without a degree are also included in "Other".

Salary

Information on teachers' salaries is presented in Tables 4 and 5. To obtain this data, only teachers who are paid according to regular salary scales, including those on sabbatical leave, are selected. Teachers not paid according to regular scales, i.e., those on leave of absence or leave without pay and certain staff in denominational institutions, have been excluded.

The salary tables presented herein are primarily aggregate summaries. As more detailed analytical tables are available, interested readers are invited to contact the Postsecondary Education Section for details concerning the Faculty Salary Analysis System. This computerized extraction system enables users to request tables based on the

nomination: professeur titulaire, professeur agrégé, professeur adjoint et le rang inférieur à celui d'adjoint. Les professeurs dont le rang est inférieur d'au moins deux niveaux à celui d'adjoint, les enseignants non classés et les enseignants invités ou visiteurs sont tous groupés dans la catégorie "Autres". Signalons toutefois que le Ryerson Polytechnical Institute ne possède aucune classification à cet égard.

Fonctions de direction

Les tableaux (1D, 2D, et 4D) renferment des données sommaires sur le personnel "avec fonctions de direction supérieure". Cette catégorie est formée des doyens, des doyens adjoints, des vice-doyens, des chefs ou directeurs de département, des coordonnateurs et des directeurs d'école.

Catégorie du plus haut grade obtenu

Cette catégorie comprend cinq classes: les doctorats, les maîtrises, les grades professionnels. les baccalauréats et la catégorie "Autres". Les grades professionnels sont décernés pour des disciplines dans lesquelles le premier grade obtenu normalement n'est pas un baccalauréat, par exemple: le M.D. (docteur en médecine), le D.D.S. (doctorat en chirurgie dentaire), le D.D.M. (doctorat en médecine dentaire), le D.M.V. (doctorat en médecine vétérinaire). La catégorie "Autres" comprend les titres professionnels autres que les grades, par exemple: le C.A. (comptable agréé), le R.I.A. (comptable industriel certifié) et les diplômes universitaires de premier cycle. Le personnel qui n'est titulaire d'aucun grade fait aussi partie de la catégorie "Autres".

Traitements

Les tableaux 4 et 5 renferment des données sur les traitements des professeurs. Seuls sont pris en compte les professeurs rémunérés selon une échelle de traitement ordinaire, y compris ceux qui sont en congé sabbatique, pour obtenir ces données. Sont exclus tous les professeurs non rémunérés selon une échelle de traitement ordinaire, c'est-à-dire ceux qui ont reçu l'autorisation de s'absenter ou qui sont en congé sans traitement, certains enseignants des établissements confessionnels.

Les tableaux sur les traitements présentés dans ce document sont surtout des sommaires agrégatifs. Nous invitons les lecteurs intéressés à se renseigner auprès de la Section de l'enseignement postsecondaire, qui leur fournira, à mesure qu'ils deviendront disponibles, des tableaux analytiques plus détaillés au sujet du Système d'analyse des traitements. Il s'aqit d'un système

latest available data for groups of institutions (minimum of four). Various selection criteria allow for the control of such factors as rank, highest earned degree, field or discipline and sex in conjunction with one of four measures of experience (age, years since first degree, years since highest degree and years since nomination to current rank).

The basis for all salary figures in this publication is the annual rate of salary as of October 1, 1982. It includes additional payments for administrative functions and other types of honoraria, but excludes fringe benefits, overtime pay, compensation for extension courses, etc. The salaries of individuals who were employed on a full-time basis for a period of less than 12 months have been adjusted to an annual rate of pay. For staff on sabbatical leave, the annual rate of pay used is that which they would have received had they not been on sabbatical leave.

The median was not calculated if the number of persons in a distribution was less than 10.

Analysis of the Data

Rank

The distribution of university teachers by rank has fluctuated over the years. Prior to the rapid increase in the number of staff during the 1960's the proportion of fulltime teachers at the two senior ranks (full and associate professor) was about 50%. During the expansion period, however, this percentage hit a low of 44% (1967-68) before reversing and beginning the long climb to the current high of 74% in 1982-83. The latter period has been characterized by a decrease in the number of new appointments. As a result, many teachers already in the system have received promotions, while many positions left vacant at the lower ranks have not been filled because of financial constraints or they have been filled by ungraded staff or by part-time teachers. Projections by M. Von Zur Muehlen, suggested that the proportion of full-time teachers at the two senior ranks will continue to increase throughout the period of declining enrolments during the next decade unless promotion policies change. (1)

(1) "A Profile of Full-time Teachers at Canadian Universities: A Statistical Review for the Eighties", M. Von Zur Muehlen, March 15, 1982. d'extraction automatisé grâce auquel les utilisateurs peuvent demander des tableaux contenant les données les plus récentes sur des catégories d'établissements déterminées (au moins quatre). Divers critères de sélection permettent d'examiner des facteurs tels que le rang, le plus haut grade obtenu, le domaine ou la discipline et le sexe, en fonction de l'une des quatre différentes mesures de l'expérience (âge, années écoulées depuis l'obtention du premier grade, années écoulées depuis l'obtention du grade le plus élevé et années écoulées depuis la nomination au rang occupé).

Dans cette publication, le traitement de base est le taux annuel de traitement au 1^{et} octobre 1982. Il comprend les paiements additionnels versés pour des fonctions administratives et autres honoraires, mais non les avantages sociaux, la rémunération du travail supplémentaire ou du travail au titre de la formation permanente, etc. Les traitements des enseignants en capagés à plein temps pour une période de moins de 12 mois ont été ajustés selon un taux de base annuel. Le taux annuel de traitement des enseignants en congé sabbatique correspond à celui qu'ils auraient touché s'ils n'avaient pas été en congé sabbatique.

Le traitement médian n'a pas été calculé lorsqu'une série comprenait moins de 10 personnes.

Analyse des données

Rang

La répartition des professeurs d'université selon le rang a varié avec le temps. Avant l'augmentation rapide du nombre de professeurs pendant les années 60, la proportion d'enseignants à plein temps qui occupaient les deux rangs supérieurs (professeurs titulaires et professeurs agrégés) était d'environ 50%. Cependant, le pourcentage est tombé à un minimum de 44% pendant la période d'expansion (1967-68) avant de remonter la pente qui l'a mené au sommet actuel de 74% en 1982-83. Cette dernière période s'est caractérisée par une diminution du nombre de nouvelles nominations. Par conséquent, de nombreux professeurs déjà dans le système ont reçu des promotions, tandis que de nombreux postes laissés vacants aux rangs inférieurs n'ont pas été dotés à cause de restrictions financières ou l'ont été par des enseignants non classés ou à temps partiel. Selon les projections de M. Von Zur Muehlen, la proportion de professeurs à plein temps occupant les deux rangs supérieurs vont continuer à progresser pendant la période de baisse des effectifs durant la prochaine décennie à moins que ne changent les politiques concernant les promotions(1).

(1) Includes 1980-81 data for Quebec universities.

(1) Les données pour les universités québécoises portent sur 1980-81.

Sex

The percentage of women in the full-time teaching force of Canadian universities was 16 in 1982-83. In a profession that has a history of a high proportion of males, this represents little gain over the ratio of 11% that was recorded 24 years earlier, 1958-59, an increase of 5 percentage points. The percentage of women teaching in fields that they have traditionally entered (education and health professions) has, in fact, declined since 1958-59, although their representation is still high in comparison to other fields. On the other hand, substantial increases in the proportions occurred in the Humanities and Social Sciences.

Sexe

Le pourcentage de femmes dans le corps enseignant des universités canadiennes était de 16% en 1982-83. Dans une profession qui compte traditionnellement une très forte proportion d'hommes, cela représente une faible progression de 5 points de pourcentage par rapport au chiffre enregistré 24 ans auparavant, en 1958-59, soit 11%. La proportion de femmes dans les domaines d'enseignement où on les retrouve le plus souvent (éducation et professions de la santé) a en fait diminué depuis 1958-59, bien qu'elle y soit encore élevée par rapport aux chiffres des autres domaines. Par contre, elle a sensiblement progressé dans les domaines des humanités et des sciences sociales.

⁽¹⁾ Includes 1980-81 data for Quebec universities.

Field

The total number of full-time university teachers increased from 5,325 in 1958-59 to an estimated 33,900 in 1982-83, more than a six-fold increase over the 24-year period. The most dramatic gains were in the fields of Health, Fine and Applied Arts and Education.

Domaine

Le nombre total de professeurs à plein temps est passé de 5,325 en 1958-59 à environ 33,900 en 1982-83, ce qui représente une augmentation de plus de 600% sur cette période de 24 ans. Les gains les plus spectaculaires ont été enregistrés dans les domaines de la santé, des beaux-arts et des arts appliqués et de l'éducation.

⁽¹⁾ Les données pour les universités québécoises portent sur 1980-81.

(1) Includes 1980-81 data for Quebec universities.

(1) Les données pour les universités québécoises portent sur 1980-81.

Qualification

The percentage of full-time teaching staff holding a doctoral degree in 1982-83 was higher than in any other year since the implementation of the survey. The proportion with doctoral degrees has increased to 63% from 42% 25 years earlier, and the pattern is the same in all fields. It is expected that the overall percentage of teachers with Ph.D.'s will increase as the number of qualified candidates available for university teaching jobs is greater than it has been in the past. A comparison of highest earned degree by sex shows that of teachers with a doctorate in 1981-82, 44% of the men compared to 18% of the women were full professors. Thirty-three percent of the women with doctorates were at the assistant professor rank compared to about 14% of the men. The number of years since the receipt of a doctoral degree is one factor that has always been significantly related to promotion from one rank to another. For the current year, the median number of years since receipt of highest degree is 14 for males and 10 for

Titres de compétence

Le pourcentage de professeurs à plein temps qui détenaient un doctorat en 1982-83 a été supérieur aux chiffres de toutes les autres années depuis la création de l'enquête. La proportion de professeurs ayant un doctorat est passée à 63% contre 42% 25 ans auparavant, et cette évolution a été la même dans tous les domaines. On s'attend que le nombre de professeurs ayant un doctorat augmente encore, le nombre de candidats qualifiés étant plus élevé qu'auparavant. Si l'on compare les chiffres sur le plus haut grade obtenu selon le sexe, on constate que 44% des hommes ayant un doctorat étaient professeurs titulaires en 1981-82, contre 18% dans le cas des femmes. Par contre, 33% des femmes ayant un doctorat occupaient un poste de professeur adjoint, comparativement à environ 14% chez les hommes. Le nombre d'années écoulées depuis l'obtention du doctorat a certainement joué un rôle important dans les promotions d'un rang à un autre. Pendant l'année observée, le nombre médian d'années écoulées depuis l'obtention du plus haut grade s'établissait à 14 chez les hommes et à 10 chez les femmes. Ainsi, le fait qu'une plus forte

females. Thus, the fact that a greater proportion of women have received their degrees in the more recent past, would account for some portion of the difference in the numbers who have reached the senior ranks.

Age

The average age of full-time university teachers shows some variations among fields, but the group as a whole is aging. In 1963-64, the median age was 39.4 years and 19 years later, it was a little over 44. This phenomenon reflects the decrease in new appointments from outside the university community over the past 8 years. The youngest group continues to be in the field of Social Sciences with a median age of 41 years. In other fields, the median varied from 43 to 46 years.

Citizenship

The percentage of Canadians increased from 57 in 1969-70 to 77 in 1980-81. The large number of landed immigrants who have taken up Canadian citizenship accounts partly for this increase. Text Table IV indicates the proportion of Canadians by region for all staff as well as for new staff.

proportion de femmes aient obtenu leur doctorat à une époque plus récente que les hommes expliquerait en partie pourquoi un plus grand nombre d'hommes que de femmes occupent les rangs supérieurs.

Age

L'âge moyen des professeurs d'université à plein temps laisse voir quelques variations selon le domaine, mais dans l'ensemble, le groupe vieillit. En 1963-64, l'âge médian s'établissait à 39.4 ans et 19 ans plus tard, il passait à un peu plus de 44 ans. Ce phénomène tient au fait qu'on a nommé moins de professeurs provenant de l'extérieur de la communauté universitaire depuis 8 ans. C'est encore dans le domaine des sciences sociales qu'on trouve le groupe le plus jeune, l'âge médian des professeurs s'établissant à 41 ans. Dans les autres domaines, l'âge médian varie entre 43 et 46 ans.

Citoyenneté

Le pourcentage de professeurs canadiens est passé de 57% en 1969-70 à 77% en 1980-81. Cette augmentation résulte en partie du grand nombre d'immigrants reçus qui ont pris la citoyenneté canadienne. Le tableau explicatif IV indique la proportion de Canadiens dans l'ensemble du personnel enseignant et dans le personnel nouvellement nommé par région.

New Appointments

The number of new appointments of staff in Canadian universities has declined significantly over the past decade in real numbers and as a proportion of total staff. In 1970-71, over 4,000 of the 24,000 staff employed were newly appointed to their institution. As a proportion, new appointments made up 17% of the teaching force. By the end of the decade, only 2,000 positions of almost 33,000 were filled with new appointments or 6.5%.

For the 1982-83 academic year, data for nine provinces show a small increase in the number of new appointments over the previous year. Of the 26,350 full-time staff, 1,920 or 7% were new appointments. The preceding year there were 1,891 newly appointed staff which also represented 7% of the total staff.

One must bear in mind that new appointments are not synonymous with new positions. The number of new appointments made in any academic year has traditionally been the result of some expansion and of vacant positions which have come open due to attrition.

In 1982-83, about 44% of the new appointees indicated their previous employment was university teaching and 13% indicated that they had been students the previous year. This percentage of new appointments from the student body has declined from 22 in 1972-73.

The percentage distribution of new appointments by rank shows that there were 16% hired at the two upper ranks, 42% at the assistant professor level and 20% below the assistant professor level. The group "Other" which accounted for 22% of all new appointments, includes various types of appointment, such as special lecturer, visiting scholars, ungraded staff usually hired on a one-year contract basis, etc.

Salaries

For the 25,441 university teachers paid on a regular salary scale, the median salary in 1982-83 was \$43,589. The median salaries by rank were as follows: full professor, \$55,618; associate professor, \$42,304; assistant professor, \$32,773; and rank below assistant professor, \$26,546.

Nouvelles nominations

Depuis une décennie, le nombre de nouvelles nominations au sein du personnel enseignant des universités canadiennes a beaucoup baissé en chiffres réels et comme proportion du total du personnel. En 1970-71, plus de 4,000 des 24,000 professeurs employés avaient été nommés récemment. La proportion des nouvelles nominations atteignait 17%. À la fin de la décennie, les pouvelles nominations comptaient pour 6.5% des postes seulement, soit 2,000 postes sur 33,000.

Les données concernant neuf provinces font voir une hausse faible du nombre de nouvelles nominations pour l'année scolaire 1982-83, par rapport à l'année précédente. Sur les 26,350 professeurs à plein temps, 1,920 ou 7% avaient été nommés récemment. L'année précédente, il y avait 1,891 professeurs récemment nommés, ce qui représentait aussi 7% du total des effectifs.

Il convient de remarquer que les nouvelles nominations ne sont pas synonymes de nouveaux postes. L'expansion et les vacances de postes dues à l'attrition expliquent normalement le nombre de nominations au cours d'une année scolaire quelconque.

En 1982-83, environ 44% des professeurs récemment nommés ont déclaré que leur emploi précédent avait été l'enseignement universitaire et 13% d'entre eux, qu'ils étaient étudiants l'année précédente. Ce pourcentage de nouvelles nominations parmi les personnes venant de terminer leurs études a baissé par rapport au 22% observés en 1972-73.

La répartition en pourcentage des nouvelles nominations selon le rang révèle que 16% des personnes ont été engagées aux deux rangs supérieurs, 42% à celui de professeur adjoint et 20% au rang inférieur à celui d'adjoint. Le groupe "Autres" qui compte pour 22% des enseignants nouvellement nommés, comprend diverses catégories d'enseignants: conférencier spécial, professeur invité ou visiteur et personnel non classé ordinairement engagé à contrat pour un an, etc.

Traitements

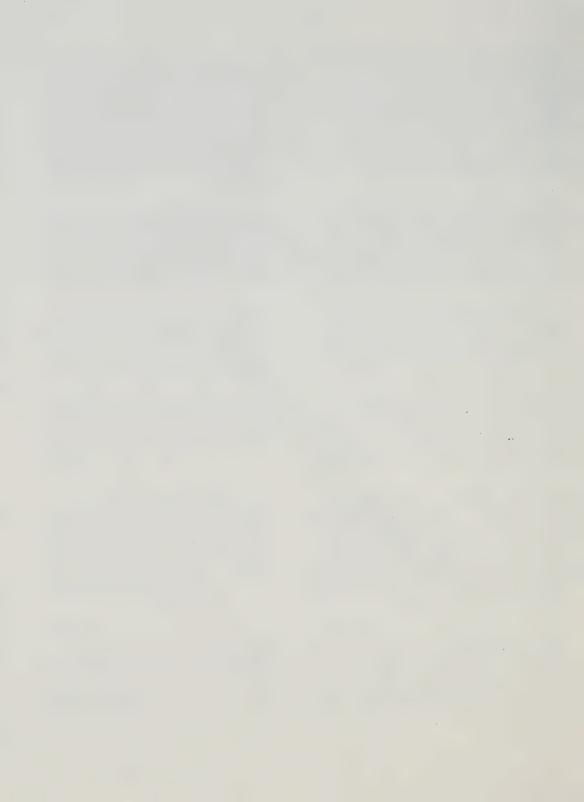

Pour l'ensemble des 25,441 professeurs d'université rémunérés selon une échelle régulière le traitement médian s'établissait à \$43,589 en 1982-83. Voici les traitements médians selon le rang: professeur titulaire, \$55,618; professeur agrégé, \$42,304; professeur adjoint, \$32,773; et rang inférieur à celui d'adjoint, \$26,546.

The highest median salaries were paid to teachers in the Western provinces (\$46,936). From 1958-59 to 1976-77 teachers employed in the Health Sciences had the highest median salary but since then, the median for those employed in Engineering and Applied Science has been the highest. In 1982-83, their median salary was \$48,181. The other fields ranked from highest to lowest in terms of median salary in 1982-83 are as follows: Health, Physical Sciences, Biological Sciences, Education, Social Sciences, Humanities and Fine and Applied Arts.

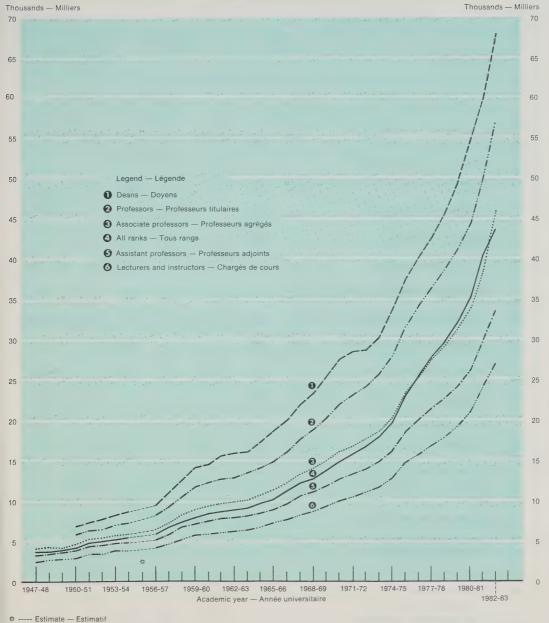

Overall, the salaries of women were lower than those paid to men. A large part of the difference in salaries can be attributed to the concentration of women in the lower ranks. However, within each rank the median salary for women was lower than that of men, with the largest difference occurring at the full professor level.

Pour ce qui est des traitements médians versés aux enseignants, les provinces de l'Ouest viennent en tête (\$46,936). De 1958-59 à 1976-77, ce sont les professeurs du domaine de la santé qui ont reçu les meilleurs traitements médians, mais depuis lors, le traitement médian des professeurs en génie et en sciences appliquées est le plus élevé. En 1982-83, leur traitement médian s'élevait à \$48,181. Les autres domaines sont, dans l'ordre décroissant, pour 1982-83; santé, sciences physiques, sciences biologiques, éducation, sciences sociales, humanités et beaux-arts et arts appliqués.

Globalement, les traitements versés aux femmes ont été inférieurs à ceux versés aux hommes. Une forte part de cet écart peut être attribuée à la concentration des femmes dans les rangs inférieurs. Toutefois, dans chaque rang, le traitement médian des femmes a été inférieur à celui des hommes, la différence la plus forte ayant été enregistrée au niveau de professeur titulaire.

Median Salaries of Teachers at 19 Universities (1) by Ranks, 1947-48 to 1982-83 Traitements médians des professeurs de 19 universités (1) selon le rang, 1947-48 à 1982-83
